Ceramic Coating

Gtechniq Ceramic Coating
Approximately 6hrs
Crystal Serum Light

From £290.00

Why Use Gtechniq Crystal Serum Light?

Crystal Serum Light is the prosumer version of the world-famous Gtechniq Accredited Detailer Crystal Serum Ultra. It offers 80% of professional Serum Ultra's performance, but if applied incorrectly can be machine polished from your vehicles paintwork.

Gtechniq Ceramic Coating
Approximately 6hrs

EXOV4 Ultra Durable Hydrophobic Coating

From £90.00

Why Use Gtechniq EXO?

EXOV4 delivers a hard film that makes water-spots easy to remove, offers great resistance to all wash chemicals and can help withstand micro-marring. It produces a high-gloss, warm-looking, extreme hydrophobic finish.

It has a consistent film that is more durable and resistant to road salt and washes chemicals than its predecessors. Application is easy, with a slow flash-off time, giving more time to achieve a perfect finish.

All of the above combined with the introduction of a good degree of swirl resistance means EXOV4 represents a major leap forward in Last Surface Protection (LSP) technology.
